

AttachView 2007

Secure Access to OWA Attachments

Extend WebReady Document Viewing in Exchange 2007

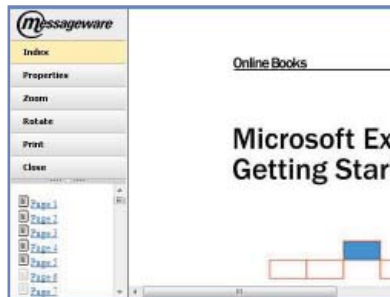

AttachView secures attachments in OWA 2007 by converting documents into secure HTML pages, extending Microsoft's WebReady Document Viewing feature to over 300 file types. Exchange Administrators can customize security settings on a granular level, controlling the user's ability to view, open, print and save documents. Advanced viewing features include viewing Microsoft Word documents in Final or Markup mode, rotate, zoom & clickable table of contents.

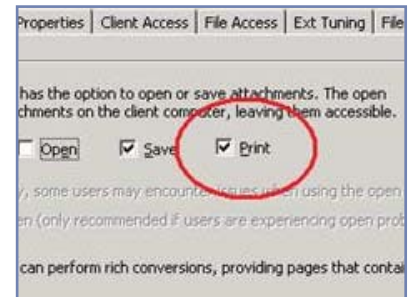

Security Features

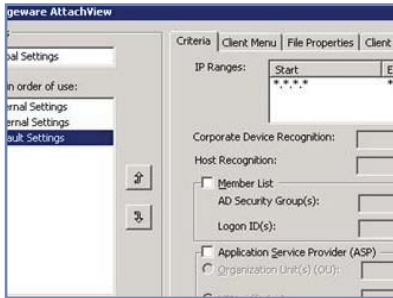

Secure Documents Everywhere
Secure attachments in the Inbox, Contacts, Calendar, SharePoint folders, Internal Server Shares, and Public Folders

Extend Microsoft WebReady Document Viewing security to over 300 file types
Give users the ability to view all document types as secure HTML pages, which don't get saved unknowingly in the browser cache of the local machine

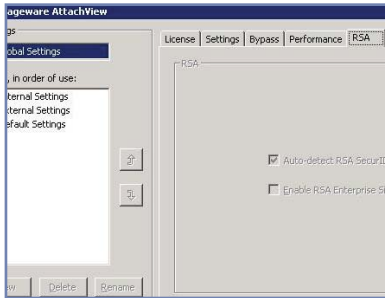

Print protection
Administrators can create rules disabling the print function in OWA attachments so users do not have the option to print an attachment, eliminating the risk of confidential documents getting left on public printers

Flexible, granular security settings

Administrators can control a user's ability to open/save/print an attachment. Groups can be divided based on IP address, user groups, corporate device recognition and additional criteria, in alignment with company security policies.

Compatible with perimeter security products

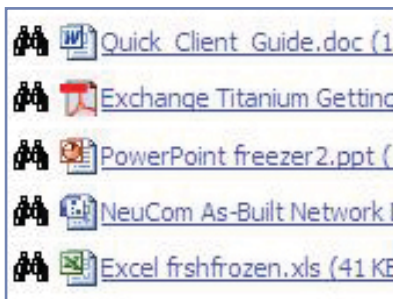

AttachView is compatible with ISA Server, RSA Secure ID, integrates with SSL VPNs

Easy Installation and Administration

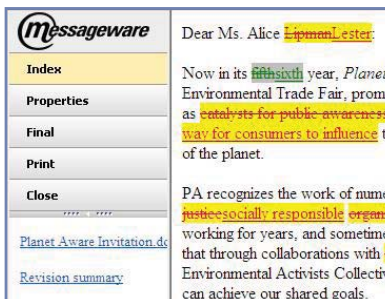

AttachView installs in minutes, on the CAS and requires no user training. Import/export of administrative settings saves administrators time when setting up multiple servers, while backup settings provides peace of mind for changes and upgrades

Productivity Features

Eliminates need for local applications to view attachments

View attachments in over 300 file formats without the need for the local application.

View Word documents in Final, Markup format, or Revision Summary format

View Track Changes revisions in Word documents so documents are not unknowingly forwarded without reviewing edits. View revision date and author, color-coding differentiates revisions by author

Superior PDF quality

View PDF documents with the best PDF quality on the market – no missing text or graphics

Enhanced viewing functions

Easily navigate long documents with a hyperlinked table of contents. Hide/Show buttons expand viewing areas. Full screen document viewing allows the user to hide menus and maximize screen. Print function converts file into printer-friendly document.

Zoom/Rotate feature ideal for viewing of faxes and images

Zoom function allows the visible size of the document to change. The rotate function allows user to rotate files clockwise, handy for viewing faxes.

About Messageware

Founded in 1993 and headquartered in Toronto, Canada, Messageware develops and markets solutions that enhance and secure Outlook Web Access. A trusted Microsoft Gold Certified Partner and a Global Exchange ISV for 15 years, our applications give companies of all sizes the ability to enhance, secure, and customize OWA. Messageware solutions give organization a greater return on their Microsoft Exchange investment through increased employee productivity and reduced support and IT administration costs. Messageware products are used by over 2,500 enterprises and four million users worldwide, from Fortune 500 companies to small businesses, in every major industry including banking, education, financial services, government, healthcare and law.

"I now can sleep easy knowing that our staff can securely access email whether they are on the road traveling to a job site or working from their home."

Michael G. Kessler
President, Kessler International

"AttachView provides much needed email attachment security and management features that are missing from OWA."
