

TimeGuard

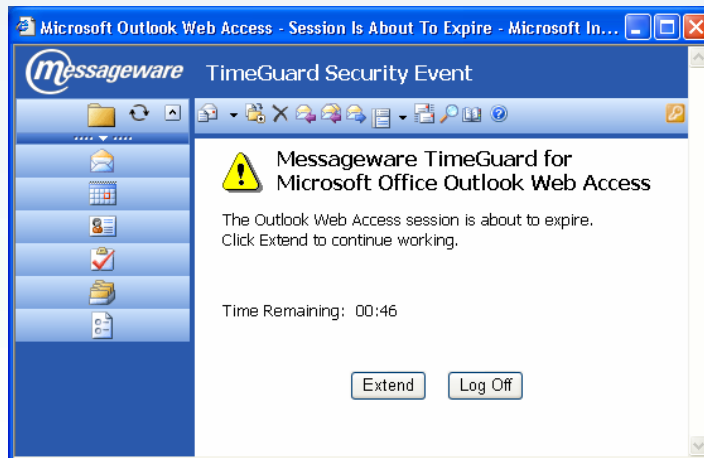

Prevent Unauthorized Access to OWA Accounts

TimeGuard protects OWA accounts from unauthorized access, -which can occur when users fail to logoff—and complete closes all browser windows. TimeGuard will automatically end a user's session after a period of inactivity. As part of Messageware's OWA Suite, TimeGuard provides comprehensive security for organizations using Outlook Web Access.

Key Benefits:

- Provides additional security to OWA users by protecting OWA accounts and intellectual property
- Provides an extra level of security – SSL protects data, TimeGuard protects user accounts
- Prevents users from losing work as a result of timing out of their OWA session

TimeGuard alerts the user when they have been inactive for a pre-defined period, and alerts them to either log off or return to OWA
