

Microsoft Exchange Secured & Enhanced

Critical End-Point Security protecting OWA
Essential Outlook Features added to OWA

Messageware is the leading provider of Outlook Web App and Outlook Web Access enhancements. Our solutions are used by over five million users around the world and have been recognized by the top Exchange industry groups, analysts and media.

Messageware CalendarShare together with Microsoft Office Outlook Web Access provides a valuable remote calendaring solution to meet the needs of our mutual customers.”

— Microsoft Corporation

“PlusPack made it possible for us to offer a complete web based messaging solution to our workforce, it’s helped us stay on top of our business.”

— Pharmaceutical (Fortune 50)

“The owners of our company have a dedicated Outlook client, but travel a lot to other offices and actually prefer using OWA over Outlook thanks to Messageware and PlusPack.”

— Century 21 Alliance

Messageware Enterprise Software is now available to U.S. federal agencies under the NASA SEWP Purchasing program.

“If you want to set up a security policy for your OWA environment and let’s face it you should, then Messageware OWA Suite is ideal. It offers excellent configurability options and is a fantastic enhancement to your Exchange infrastructure.”

Critical End-Point Security

The only **OWA Application Specific** security in the industry! Necessary additions to ISA, TMG, RSA, and Other Perimeter Devices, Essential for stand-alone environments.

•	Protect documents from being left behind
•	Ensure users are responsible for downloads of corporate documents
•	RBAC Security to control open, save, and print by types of users, devices, location, and AD Security Groups
•	Enforce maximum OWA session time-out, ensuring sessions are always closed down
•	User friendly warnings of inactivity and upcoming session timeouts
•	Identify documents that contain annotations and mark-ups to ensure they are not inadvertently forwarded
•	Protect users and their mailboxes from accidental navigation that leaves OWA alive in the background
•	Enable users to select delegate security permissions for on-behalf-of calendar/scheduling management

Messageware Server Suite 2010 · 2007 · 2003 · 2000

Secure and Enhance Outlook Web App/Access

The Messageware Server Suite extends the functionality of OWA with its award-winning Outlook Web App / Access user enhancements in one convenient and cost-effective bundle.

- Enhance OWA and OWA Light with key Outlook-like features
- Advanced Search, Side-by-Side Calendars, Printing, Delegate Rights, New Mail Notifications and more
- Secure OWA Sessions and Navigation to protect your organization and its users
- Enhance Web Ready Viewing with over 400 file types, role based security, and critical document protection
- Secure your confidential data and surpass your security audit requirements

Messageware Client Suite 2010 - 2007

Desktop tools to enhance Outlook Web App/Access

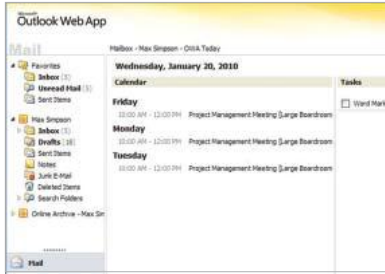

Messageware's OWA Client Suite brings together two unique client side applications that deliver functionality to the OWA user that was previously only available with desktop Outlook .

Messageware's OWA Client Suite enhances Office Web App/Access with Outlook-like functionality most requested by OWA users. The Client Suite brings together Messageware's award winning client side applications in one cost-effective bundle. Deploy OWA with confidence while enhancing business productivity and user efficiency. The Client Suite is available for Microsoft Exchange 2010 and 2007.

--	---

Plus Pack

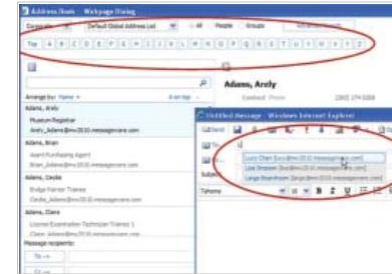

Plus Pack adds Outlook features into OWA and seamlessly integrates additional user enhancements to OWA addressing, Contacts and address Search. With Plus Pack messaging tasks that normally take minutes can be accomplished in seconds.

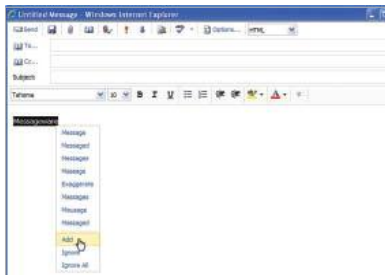

The OWA Today page provides a preview of your day with a summary of your appointments, a list of your tasks, and number of unread e-mail messages.

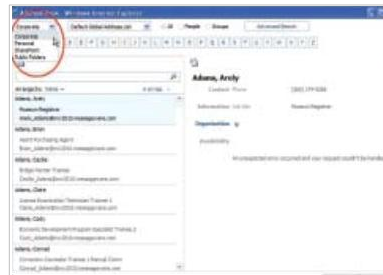

Enhanced New Mail Notification provides the ability to easily see, read, reply, forward and delete new messages

Users will love Messageware Plus Pack's intuitive addressing which includes a Rolodex style address book, and Type-ahead.

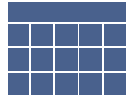

Users can add words to personal dictionaries that roam with them – no more spell check flags on uncommon names & business terms.

Address from Personal Contacts, Public Folder contacts and SharePoint contact lists offering true Outlook-like addressing.

With Advanced search users can search the Corporate Global Address List using search fields such as: Display Name, Title, Alias, Company, Department, Office or City.

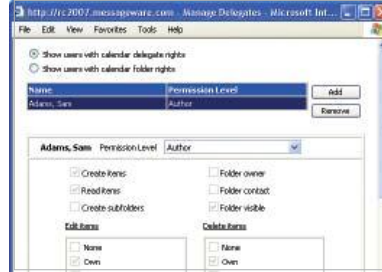

CalendarPack CalendarShare

Messageware CalendarPack (2010)/CalendarShare (2007) add critical functionality to calendaring with holiday file support, side by side viewing, management of delegate rights, and OWA Light reminders and calendar views.

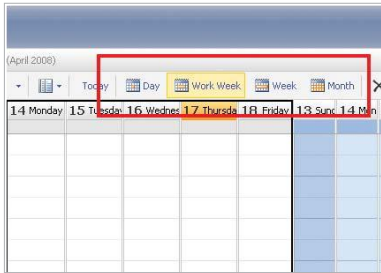

Schedule meetings or book resources at-a-glance with side-by-side shared calendar views (2007).

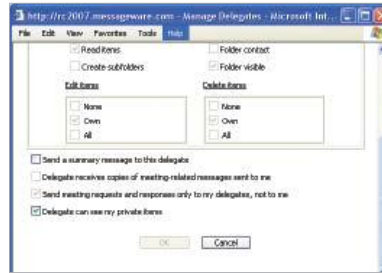

Delegate other users to view and manage calendars on your behalf.

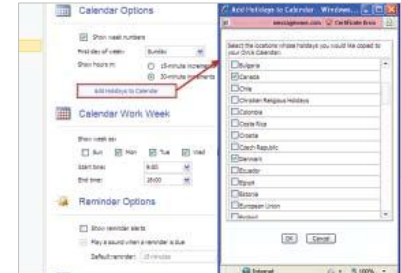

Users can send a message informing delegates of their permissions.

Add work week, week and month calendar views to OWA Light.

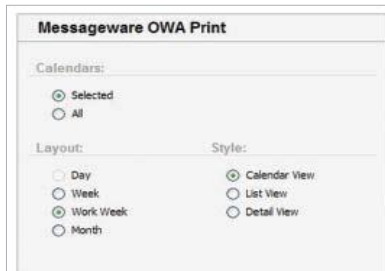

Enable users to set permission levels for public and private appointments.

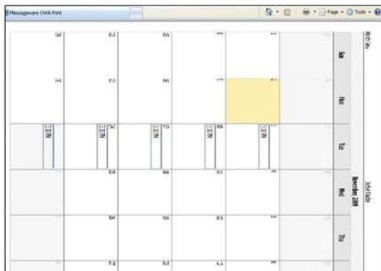

Religious, national, corporate holiday events can be imported into OWA users calendars.

OWA Print provides users with a powerful printing capability for calendars and contacts from within Outlook Web App / Access

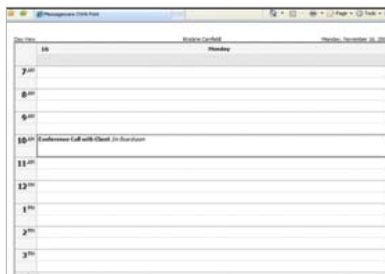

OWA Print will print a high quality formatted document from any layout of calendars and schedules.

Select the Layout of the printed Calendar; Options include any of the four available Calendar Views: Day, Week, Work Week, and Month layouts.

Give OWA Light users the capability to print emails; a function not available natively.

Choose the style of the schedule to be printed. Month, week or day can be printed in graphical, detail or summary styles.

Print personal contacts in summary, memo, business card, or phone directory styles. Advanced options include combinations of graphics and layouts.

OWA Light users will have the ability to print Appointments and Meetings in a concise printout summarizing all of the details.

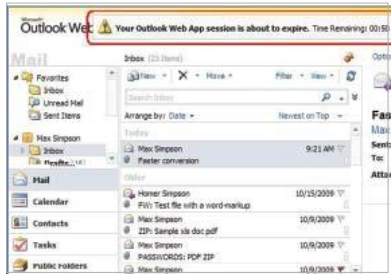

NavGuard · TimeGuard · SessionGuard

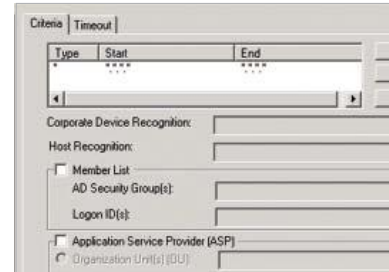

Messageware NavGuard, Messageware TimeGuard and Messageware SessionGuard prevent users from leaving active OWA sessions accessible to unauthorized users

NavGuard warning requires the user to either log off before continuing to another web page, or return to OWA.

TimeGuard provides a maximum timeout option which requires users to re-authenticate after a predefined maximum session time has passed.

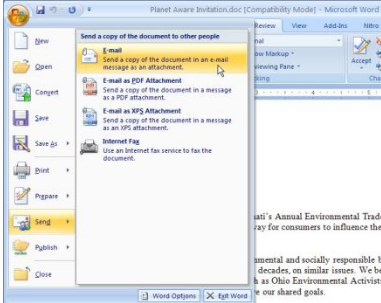

Exchange System Administrators can customize security policies according to their corporate policies, user's hardware and current locations (zones, AD groups, device recognition).

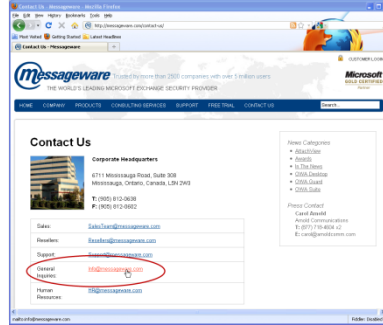

TimeGuard prompts a user when they have exceeded their session inactivity limit with the opportunity to extend the session or log off.

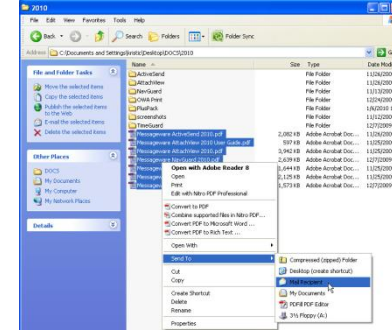

Messageware ActiveSend enables Microsoft Office & other applications to use OWA like Desktop Outlook. Send files with one click File SendTo/MailTo commands.

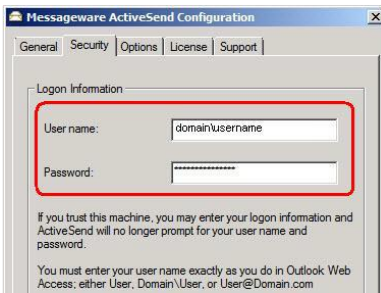

Send from Microsoft Office in one click using ActiveSend and OWA.

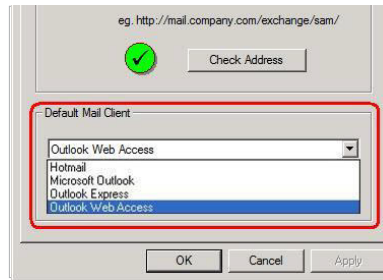

With ActiveSend, email links on web pages now launch OWA.

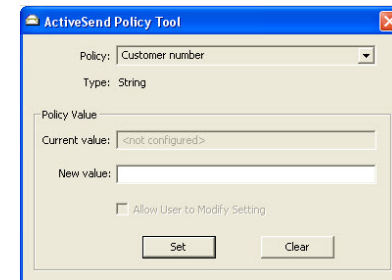

Quickly Email multiple files in a single click using OWA as the default email.

Securely save username and password to quickly launch OWA.

Easily toggle between OWA and other email accounts.

Easily install and configure ActiveSend for the corporate environment.

OWA Desktop

Messageware OWA Desktop brings webmail functionality to the user's desktop; providing the power and access of the Microsoft Outlook Web App right from the system tray.

Immediate access to all available functions.

Real time, interactive Reminder and Notification windows.

Easily open fully functional OWA Windows in which you can create new, or modify existing items.

Set preferences with the Options page .

Import or export personal contacts and holidays within OWA.

About MessageWare

MessageWare develops and markets solutions that enhance and secure Outlook Web Access.
