Messageware OWA Desktop

Desktop Email Control for Outlook Web App/Access

OWA Desktop gives users complete control over their OWA session from their desktop with real time alerts and advanced one-click features.
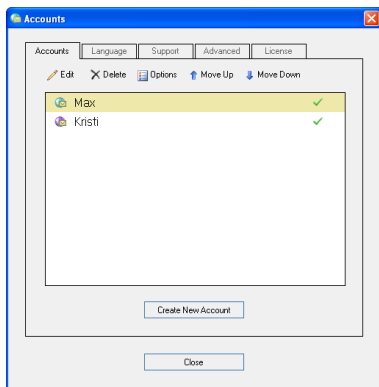

OWA Desktop brings OWA webmail functionality to the user's desktop, mirroring the Outlook experience, but with the added benefit of a thin client. No more need for a log-on every time a user would like to view or send a message or access their calendar. New mail and appointment alerts, with one-click access to advanced features, available right from the system tray, are provided to the user in real time. OWA Desktop gives the user all the functionality they have come to expect and depend on from Outlook and goes a step further by providing time-saving features not found in native desktop Outlook.

Have Instant, Outlook-like Access to OWA without having a browser window open, giving the user all the functionality they have come to expect and depend on from Outlook plus more.
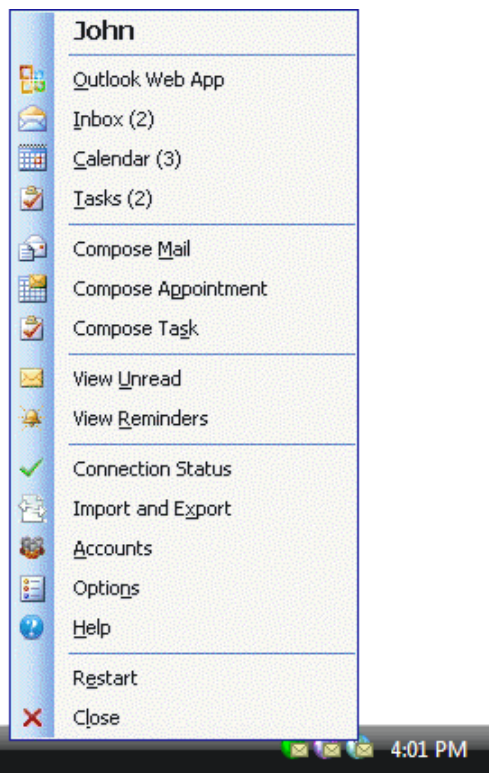

Single Click Inbox and Calendar Views, and one click to compose emails, appointments and tasks.

New Mail Notification and appointment alerts that are highly functional and interactive, with one-click access to advanced features, provided to the user in real time.

Multiple Accounts are easy to set up and use.

Easily Incorporated Into Environments using Exchange 2007 or 2010, and environments using Office 365, or Hosted Exchange.

The Power And Access of the Microsoft Outlook Web App provided right from the system tray.

Messageware OWA Desktop is a client side application available for use with Exchange Server 2007 and 2010.
