

Outlook Web App/Access Productivity and Security Messageware Plus Pack

Enhanced productivity with outlook – like functionality

Plus Pack seamlessly integrates key features such as versatile addressing, spell checking, advanced search capabilities, new mail notification and much more, transforming OWA into Outlook.

Extending the functionality of the standard Outlook Web App client available on Exchange 2010; Messageware Plus Pack seamlessly integrates key features such as intuitive, Outlook-like addressing, Rolodex style address book, addressing from Public Folder and SharePoint contact lists and personal user dictionaries that will be available to the user everywhere.

Further features incorporated in Plus Pack include an OWA Today page modeled after the Outlook Today page in Outlook Desktop Client, advanced customizable search capabilities, and Enhanced New Mail Notification that provides full navigational control over the disposition of a message without the requirement of switching to the OWA screen.

Improve User Productivity by making OWA look and operate more like Desktop Outlook significantly improving the OWA user's experience

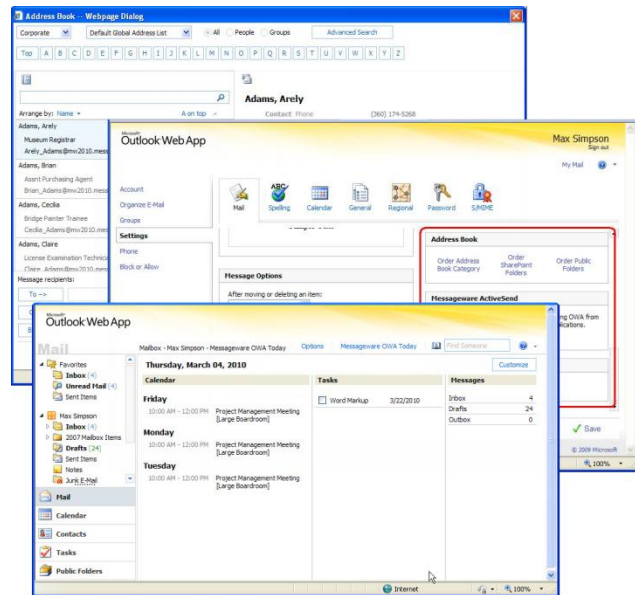

Roaming Personal Dictionary enables users to add and remove words in personal dictionaries – simplifying and enhancing Spell check.

Advanced, Intuitive Addressing including enhancements such as a Rolodex style address book, addressing from Public Folder and SharePoint contact lists

OWA Today Page modeled after the Outlook Today page in Outlook Desktop Client providing a summary of your appointments, a list of your tasks, and how many unread email messages you have

Advanced Search Capabilities that give users the capability to search for recipients in the Corporate Global Address List using customizable search fields

New Mail Notification that is highly functional and interactive providing the ability to easily see, read, reply, forward and delete new messages

Messageware Plus Pack is available for Exchange Server 2003, 2007 and 2010.
