

Messageware ActiveSend

Powerful Desktop Integration for Outlook Web

Top Features:

- **Increase User Productivity** by integrating OWA with the computer desktop and web applications. With ActiveSend, OWA users no longer have to save documents to their local computer and attach files to an email, saving time and effort.
- **Send Email with OWA** from within Microsoft Office and desktop applications.
- **Enable MailTo Functionality** on web pages with OWA as the default mail client
- **Email Multiple Files with a single click** from within office applications and windows explorer using OWA as the default mail client
- **Add Outlook Functionality to OWA** to ease the transition for Outlook users to OWA.

ActiveSend completely integrates OWA with the computer desktop and all applications, such as Microsoft Office, to provide users increased Outlook-like convenience and productivity.

ActiveSend integrates Outlook Web App with Microsoft Office and desktop applications, allowing users to quickly and easily email files from within applications, using OWA as the default email. ActiveSend enables the File/SendTo command from within the application, as well as "Mail to" functionality on web pages, using OWA as the default email. With ActiveSend, OWA users no longer have to save documents to their local computer prior to attaching files to an email, saving time and effort.
